EXPERIENCE

Software Developer
Biomni

📅 July 2024 – Present   📍 London, London (remote)

Software Developer
Illuminet

📅 September 2022 – July 2024   📍 Poole, Dorset (remote)

- Developed numerous websites using React paired with MongoDB or Firebase.
- Setting up and maintaining CI/CD pipelines. I governed large changes to Illuminet's release process, introducing trunk-based branching, semantic versioning, greater commit hygiene, and release checklists.
- Using the Express framework for Node to create backends. In addition, I used Node to create a CLI program that formed part of Illuminet's internal tooling for architectural consultancy.
- Test-driven and business-driven development - creating unit, integration, and end-to-end tests. Transitioned the team to use in-memory databases and mocks for tests in CI/CD pipelines.
- Participated in agile ceremonies; running standups, retrospectives, sprint planning, planning poker, and demos to non-technical stakeholders.
- Writing user stories, gathering requirements, and creating wireframes, ArchiMate models, and designs.

Supervisor
Primark

📅 July 2022 – September 2022   📍 Bournemouth, Dorset (in-office)

Retail Assistant
Primark

📅 February 2018 – July 2022   📍 Bournemouth, Dorset (in-office)

EDUCATION

Level 4 Diploma
Software Development
British Computer Society

🎓 May 2024   📍 Bournemouth, Dorset

Bachelor of Science
Biological Sciences
Bournemouth University

🎓 May 2022   📍 Bournemouth, Dorset

PROGRAMMING LANGUAGES

JavaScript   TypeScript   C#

TECHNOLOGIES

Node.js   React   Vue.js   Linux   Git

Web Development
